

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

What do you want me to tell my 12 year old daughter who was raped at age 9 when I can't afford to keep her pre-paid phone that she has to help her maintain a shred of sanity by clinging to the security and piece of mind that phone gives her because you money grubbing politicians give a crap less about the individual and only cater to the election fund contributing mega corps? You want me to tell her she can't feel safe any more because corporations felt they shouldn't pay more for a service they use more than she does? That she can't have her phone any more because she who makes maybe 4 calls a week has to pay as much as a corporation that makes 4000 calls a day?

My God pull your freaking heads out of.....

Keep the USF Fair!

Sincerely,

Bradley Dodd
